

Junior Sales Support (temporary assignment, 1 year)

Your new role – challenging and future-oriented:

- You will be integrated into an operational team starting on your very first day, with whom you will work on different projects.
- The tutor — an experienced professional — will give assistance, guiding you through the internship with know-how and advice.
- You will initiate consulting support regarding our products and solution portfolio with a deep understanding mindset on the added value of digitalization, automation and electrical drives solutions.
- You will stay up to date with new products and feature launches and ensure sales team is on board, prepare proper technical offers for customers and sales teams requirements.
- You will collaborate with sales team to identify specific customers technical needs and prepare the information to be delivered.
- You will collaborate with sales team for implementing the marketing strategy of the Digital Industries portfolio (newsletters, promotion activities, customer events).

Your qualifications – solid and appropriate:

- Student, graduate or following a Master's program in Automation, Electrical, Mechanical or IT Engineering field;
- Good understanding of basic electrical engineering and industrial automation;
- Achievements in academic and/or non-academic activities are a plus;
- Internship experience in electrical engineering and/or automation industry is a plus;
- Analytical and critical thinking;
- Open-minded, innovative and responsible;
- Motivated and with the ability to learn and grow;
- Good interaction and communication at all levels of the company;
- Very good English skills – written and spoken;
- Excellent Microsoft Office skills;

What we offer:

- Full time paid working student program plus additional benefits (meal tickets, gift tickets, medical subscription, etc.);
- Possibility to become a permanent colleague of ours after 1 year;
- An opportunity to learn and grow;
- Real life working experience;
- An open environment where you can express your ideas and take initiatives;
- A very nice set up, where we really care about our people;

What else should I know?

- Availability for a full-time program.
