Tasks

- Managing the information flow of roll-out projects (sites inventory, activities performed, resources necessary)
- Offering support and liaising with the Group Support Engineering team and the Chad operational team on implementation related issues
- Inventory monitoring of local stocks in interface with the local SCM (Supply Chain Manager)
- Following-up on ePro orders for necessary equipments/materials stock
- Checking the application limitations of the local customs exemption
- Synthesizing and monitoring the roll-out schedules including logistical constraints
- Monitoring budgetary commitments of projects
- Reporting the status of the implementation and any changes identified

Requirements

- BS/MS degree, preferable in energy/telecom
- 1-2 years of administrative work experience
- Microsoft Excel proficiency
- Basic Project Management skills
- Administrative skills
- Self organization, attention to details and proactivity
- Proficient in English; written and oral communication in French would be an advantage
- Customer care skills

Benefits

- Motivating salary
- Performance bonuses
- Opportunity to work in major innovative and international energy projects
- Opportunity to interact with diverse cultures and power technologies
- Performance-based career and development opportunities in a multicultural environment
- Training and certifications
- Benefits package (medical pass, transportation, hobbies sponsorship and others)
